

Parents of Miami Lakes K-8:

It is that time again. As every year during the months of September and October, our school is celebrating the Hispanic Heritage Ephemeredes. This year the students in our school are going to be developing projects about Latin American Countries. Each student will be studying one country and working under the supervision of his/her Spanish teacher. Please visit our school website and check the Spanish teacher websites for more specific information. The due date for the project is October 10, 2008. Please we need your cooperation in order to pursue our goal, which is to research, investigate, and learn about our Hispanic background as a community. If you have any questions, please e-mail your child's Spanish teacher.

Thank you again for you support.
